

Venture Upward

Helping schools bring students back to public education through individualized learning programs.

Our Mission

Helping families cultivate and embrace a culture of lifelong learning and success.

Our Vision

- Accelerated learning through high-quality books and online curriculum, literacy initiative, and increased student engagement.
- Meaningful community involvement through weekly on-site programs, field trips, service projects, and other enrichment activities.
- Dynamic training opportunities for every student: proactive leadership, technology, and growth mindset.
- Empowering parents as they create customized educational paths for at-home learning through personalized mentoring and unwavering support.

Curriculum and Programs

Ensuring that students have the resources they need to succeed.

Venture Upward's educational philosophy is built on the premise that every student is unique and that creating a truly customized educational experience will provide the best opportunity for every student to reach their full potential. Rather than limiting students to one online provider, our approach allows for customized educational plans. We bring the finest online curriculum to your at-home students. Mathseeds, Edgenuity, Studies Weekly, IXL, and CTC Math are among our top-tier offerings. Venture students are required to take courses in all four core content subject areas. All online curriculum offerings are nationally recognized and aligned to state standards.

Onsite elective courses are offered one day per week to complement the student's core curriculum. Venture School is one of the favorite aspects of the Venture Upward program! Our Venture School is an onsite, drop-off program that allows kids to explore and learn together with other Venture students. Experienced and enthusiastic teachers engage children in various interactive, hands-on classes such as world geography and the study of foreign languages, art, robotics, money management, science, physical education, and tutoring. We also offer project-based subscription boxes as an at-home alternative to Venture School.

Depending upon the school model, we can deliver a variety of customized program options to best suit the needs of your school.

Recruiting

We educate families on the benefits and challenges of virtual learning to ensure their success in the Venture Upward program.

We bring students to your district or charter school through our extensive recruiting channels. Venture Upward will continue to facilitate student enrollment by:

- Helping with student registration, including Title 1 services, obtaining immunization records, and completion of the registration process
- Working in conjunction with your school to follow the re-enrollment process for current students
- Following school guidelines for applicable waitlist lotteries, which are always held under the direction of the partner school
- We strive to help parents and students feel supported and empowered to create an educational experience that is truly individualized to meet their student's specific needs

The following advantages of our program will draw students to your district or school:

- Excellent online curriculum options
- Customized academic plans
- Exciting onsite programs
- Additional educational and enrichment resources
- Unrivaled teacher support
- Student engagement development
- Community service projects

The Venture Upward Model

Venture Upward provides customized academic pathways for students in grades K-8, utilizing proven virtual and independent study methods. We provide comprehensive program implementation and support services for schools as requested. This includes but is not limited to student registration, academic planning, progress monitoring, mentoring, customized intervention, and assessment. Providing choice and flexibility to students regarding curriculums, learning styles, and daily schedules is essential to the success of our unique model of at-home learning. All curriculums meet state educational standards and requirements.

Teachers

Inspiring and motivating students and supporting parents in a cooperative learning model.

We bring qualified teachers in the configuration that works best for your school. Our teachers work with students to enhance their learning experience. We provide parent support and help them understand the requirements of their student's curriculum, answer questions about the program, and make sure they understand state testing. Based on your needs, our teachers can:

- Assist students with course selection
- Prepare an educational plan for approval
- Create and review progress reports
- Submit reports to the teacher of record
- Serve as main contact for students and parents
- Provide multiple touch-points with students weekly
- Support school in administering state testing
- Maintain transparency and accountability through technology
- Provide LEA, school, parents, and students with real-time visibility of student progress

Special education services are provided by the district or school. Depending upon the school model, we can deliver these services in a variety of customized ways to best suit the needs of your school.

Our Valued Partners

Venture Upward collaborates with public and charter schools throughout the United States. Although most partner schools already house an online program, our team is equipped to help any school implement a virtual learning program!

Our students register with a Venture Upward partner school located within their state and meet all school educational requirements. We offer curriculum and supporting services to help students learn in the way that best suits their unique needs and abilities. Venture Upward commits to creating a customized program that will meet the needs of your school and one that maximizes the learning and achievement of every student.
