

Venture Upward Overview:

We celebrate the uniqueness of every child. By partnering with public schools, Venture Upward provides families with tuition-free, home-based education for students in K-6th grade including: access to curriculum, funding for supplies, onsite community activities, and teacher support. We use a hands-on approach to help students develop a lifetime love of learning.

Program at a Glance

- Four Core Courses: Online curriculum or Venturing Ahead path
- Venture School: Weekly onsite program
- Field trips for the whole family and community service opportunities
- Venture Reward: funding to purchase items that support current courses
- Teachers provide individualized attention, support, and guidance

Program Requirements

- All students: Weekly progress in each of the four core subjects
- Grades K-3: Weekly progress in early literacy phonics program
- Weekly participation in Venture School
- State Standardized testing

**Helping
families
cultivate &
embrace
a culture
of lifelong
learning and
success.**

Connecting Communities

An onsite, drop-off program is offered at Venture Schools one day a week. Parents have the option to stay and volunteer. Students participate in culture focused electives, or other subjects such as: geography, art, and physical education. In addition, field trips and community service projects are offered throughout the year to all members of participating families.

Curriculum Choices

Students pick curriculum for each of the four core subjects, selecting from options such as: Teaching Textbooks, Mathseeds, Imagine Learning, Edgenuity, Studies Weekly, IXL, and CTC Math. Every student receives \$1,000 in Venture Reward funding to purchase items that support current courses. Our partner school provides every student with a computer. Please note that Venture Reward funds cannot be used to purchase religiously-based curriculum.

Teacher Support

Dedicated teachers support families with everything from curriculum selection to answering everyday questions, and even tutoring. If parents notice the need for further support in a subject, they may request a Student Success Team (SST) at any time. The SST program allows us to begin research-based interventions at the very first sign of struggle or concern, without any hoops to jump through. We can also help coordinate additional support with our partner school.
