

Venture Upward

How Our Program Works

Venture Upward recognizes and celebrates the uniqueness of every child. We partner with public schools to provide a free and customized home-based learning experience for students in kindergarten through eighth grade. We help families to create a customized curriculum path which has been tailor-made to meet the unique needs and learning style of each student. While learning takes place primarily in the home, we also offer on-site classes, group field trips, and community service opportunities. This individualized and hands-on approach helps children to develop a lifetime love of learning.

Curriculum and Programs

Ensuring that students have the resources they need to succeed.

Venture Upward brings you the best online curriculum. With enrollment, all students receive free access to quality curricula such as Mathseeds, Reading Eggs, and Studies Weekly. Students may also choose the hybrid option, where they work in combination of IXL and workbooks.

Every student receives a Venture Reward, which is intended to help families purchase other online or hardcopy curricula of their choosing. Please note that Venture Reward funds cannot be used to purchase religiously-based curriculum.

We also offer engaging on-site classes at Venture School one day per week to compliment your child's core curriculum. Venture School is a drop-off program, but of course, parents are

always welcome to stay and volunteer! Students love the exciting array of electives offered onsite, as well as the friendships they build. Experienced and enthusiastic teachers engage children in various interactive, hands-on classes such as world geography and the study of foreign languages, art, robotics, money management, science, physical education, and tutoring. However, we understand that on-site classes are not the right fit for every student, which is why we also offer project-based subscription boxes for an at-home alternative.

The Venture Team values community and connection, which is why we learn, play, and work alongside one another. The Venture School staff coordinates several service opportunities throughout the school year. We also plan fun and captivating field trips! Community service projects and field trips are open to the entire family, and there is never a cost to you for these fun-filled opportunities! Our extensive online community is another platform in which Venture families will find connection and support.

Teachers

Our qualified and experienced teachers are here to guide you every step of the way. Both you and your student can count on their individualized attention and support through your entire journey with Venture Upward. Your student's success is always our primary goal.

MISSION: Helping families cultivate and embrace a culture of lifelong learning and success.
