

Cooperative Games:

Students learn simple games each week to work through the joys and sometimes struggles of playing new games. Students will play together to work on communication, positive interactions no matter the outcome of games, and just having fun with games they can introduce to their families.

MISSION:

Helping families cultivate and embrace a culture of lifelong learning and success.

Idaho Venture School Class Information

Twin Falls

Tuesday • 9:30am–2:00pm

ASL: Students are introduced to the beginning work of American Sign Language. Students will practice letter spelling, foods, seasonal words, etc. as they take a hands-on approach to learning sign language through games, books, and conversations.

Stem Class: Students come to class each week ready to engineer small projects, test out the scientific method, and/or use their minds to complete a STEM challenge alone or in a group. Students are able to hone in their STEM skills as they find out what works, and what doesn't, while being encouraged to never give up throughout the process.

Life Skills: Students are introduced to weekly topics about different skills necessary as they grow. From appliances to economics, from etiquette to dressing for success, students learn through hands-on activities and learning with others.

PE: Game play, communication skills, and physical fitness are the focus of our weekly PE classes. Students learn about their bodies and the importance of physical activity while learning skills and playing fun games with friends.

Masterpiece Makers: Masterpiece makers is an introduction to various artists, blending the exploration of their work with fun, hands-on activities. Each week focuses on an artist and incorporates age-appropriate skills and projects that allow students to connect with the art while encouraging creativity and self-expression.
