

VENTURE UPWARD

Education reimagined through individualized learning

Our Mission

Helping families cultivate and embrace a culture of lifelong learning and success.

Our Vision

- Accelerated learning through high-quality books and online curriculum, literacy initiative, and increased student engagement.
- Meaningful community involvement through weekly on-site programs, field trips, service projects, and other enrichment activities.
- Dynamic training opportunities that cultivate next-generation leaders, amplify creative voices, and facilitate purposeful career exploration.
- Empowering parents as they create customized educational paths for virtual learning through personalized mentoring and unwavering support.

Curriculum and Programs

Venture Upward was built on the belief that every student benefits from a customized educational experience. Students follow individualized educational plans supported by high-quality online curriculum options, including Adventure Learning Labs, Imagine Learning, Mathseeds, Studies Weekly, CTC Math, Teaching Textbooks, and BYU's High School Suites. Each curriculum is intentionally reviewed and mapped to state standards by our dedicated Curriculum Team, which analyzes coverage and identifies gaps. When gaps are found, Venture Upward develops targeted Learning Labs and supplemental instruction to ensure comprehensive standard alignment and academic growth across all subject areas.

- The Curriculum and Program components are selected to support academic growth and ensure students meet or exceed state assessment expectations.
- Instructional models are flexible and adaptable to meet the unique needs of each partner school.
- Venture School is an optional, on-site, drop-off program focused on collaborative, hands-on learning. This program is offered one day per week to complement core instruction. Course offerings may include world geography, foreign languages, art, money management, science, LEGO robotics, and tutoring. Project-based subscription boxes are available as an at-home alternative to Venture School.
- Custom elective courses are designed to align with applicable state and district requirements and support required instructional outcomes.
- Assessment data indicates that, in the majority of cases, Venture Upward students achieve outcomes that meet or exceed those of their peers in traditional brick-and-mortar environments.

School Partnership

Venture Upward collaborates with public and charter schools throughout the United States and provides customized academic pathways for students in grades K-12 utilizing proven virtual and independent study methods. We have extensive experience launching new virtual programs from the ground up, as well as supporting the recovery of underperforming or discontinued programs. We specialize in stabilizing systems, rebuilding family trust, and re-engaging students while maintaining accountability, compliance, and academic integrity. What could partnership with Venture Upward look like for your school?

Recruiting

We educate students who are already seeking flexible or alternative learning options about the benefits and challenges of virtual learning to ensure their success in the Venture Upward program. We re-engage students who are not attending a traditional setting and bring those students to your district or charter school through our extensive recruiting channels, supporting enrollment growth without pulling students from existing brick-and-mortar schools. Venture Upward will continue to facilitate student enrollment by:

- Helping with student registration, obtaining immunization records, and completing the registration process
- Working in conjunction with your school to follow the re-enrollment process for current students
- Following school guidelines for applicable waitlist lotteries, which are always held under the direction of the partner school
- Supporting parents and students as they create an educational experience that is truly individualized to meet each student's specific needs

In addition to our strong national reputation, the following advantages of our program will draw students to your district or school:

- Excellent online curriculum options
- Customized academic plans and support
- Flexible daily schedules
- Highly requested on-site programs
- Additional educational and enrichment resources
- Unrivaled teacher support and professional development
- Student engagement strategies
- Community service projects

Solving Today's Staffing Challenges

Across the country, the majority of open teaching positions exist because educators are leaving the profession. Districts need partners who understand this reality and know how to respond.

We excel in recruiting, training, and retaining high-quality teachers for online learning environments. Our team provides ongoing professional development and instructional coaching throughout the year, shaped by teacher needs and feedback, ensuring educators have ongoing opportunities to grow, refine their practice, and remain at the forefront of innovative teaching. This strong support system allows teachers to focus on what matters most: students.

Teachers are the face of our program. We invest in them intentionally, equipping educators with research-based practices, meaningful mentorship, and the tools they need to thrive, grow, and lead in their work.

By supporting teachers well, we create stability for students and reliability for districts while building a program known for excellence, strong family engagement, and unmatched customer support.
